

ORCHESTRATING MICROBIOME ANALYSIS WITH BIOCONDUCTOR WORKSHOP

This week-long workshop will explore how Bioconductor supports microbiome data science through modular and interoperable workflows. Participants will be guided through practical examples of how to analyse, manage, and reproducibly report complex microbiome data using R.

Week
long

9 AM to
4:30 PM

BETin, Addis Ababa,
Ethiopia

21-25
Sep, 2026

You Will Learn:

- Analysis of complex microbiome data
- Managing and integrating multi-modal microbiome datasets
- Building reproducible and scalable pipelines

*Basic familiarity with R is required

COST: FREE (participants will cover their own accommodation and travel)
